Baseline product line

FireProtect 2 AC (Heat/CO) Jeweller

Wireless mains-powered fire detector with heat and CO sensors

Heat sensor

- Two A1R-class thermistors are located outside the enclosure to eliminate detection delays
- Alarms when the temperature increases by 10°C within a minute or exceeds +64°C

CO sensor

- Accurately detects the CO level for up to 10 years
- Warns when concentration reaches the dangerous level of 50 ppm, before the first signs of poisoning occur

The detector is powered by 110–240 V~ mains and includes a sealed backup battery. Even in a power outage, the detector continues to operate, ensuring quick and reliable fire detection throughout its 10-year lifespan.

$\sim - \sim$ Enhanced wireless interconnection

AC detectors can synchronously notify of a fire alarm through **primary** (via Ajax hub) and **fallback** (detector-to-detector) interconnections. In case of alarm, the hub activates the primary interconnection **in 20 s**. All information is instantly available in Ajax apps: initiating detector's location, fire alarm type, and exact time. Meanwhile, the initiating detector activates the fallback interconnection. Even if the connection with the hub is lost, raising the interconnected alarm takes only a minute.

- Regular polling of each system device to display current statuses in apps
- Automatic detector self-diagnosis with state reporting to the hub
- Up to 1,700 m of wireless communication and twice as much with a range extender
- Instant maintenance notifications

- Automation scenarios activation
- Visual alarm verification using MotionCam detectors or any NVR camera
- Indoor/outdoor intrusion sirens activation
- Alarm delivery to CMS
- Built-in 85 dB siren
- LED indication of detector states

- SmartBracket panel to mount the device without disassembling the enclosure
- Removable WAGO 221 connectors to secure the wires without a screwdriver
- A lock to secure the device on SmartBracket
- Pairing with a hub via QR code, with remote control and configuration in the app

Superior, Fibra, and Baseline product lines are mutually compatible. This opens up numerous possibilities for building systems of any configuration.

Compliance

EN 54-5:2017+A1:2018 EN 50291-1:2018 BS 5839 (part 6, grade D1)

Compatibility

Hubs

Hub Plus, Hub 2 (2G), Hub 2 (4G), Hub 2 Plus, Hub Hybrid (2G), Hub Hybrid (4G)

Range extenders ReX, ReX 2 **Communication with hub**

Jeweller communication technology

Frequency bands 866.0-866.5 MHz 868.0-868.6 MHz 868.7-869.2 MHz 905.0-926.5 MHz 915.85-926.5 MHz 921.0-922.0 MHz Depends on the sales region

Communication range up to 1,700 m In an open space

Power supply

Main 110-240 V~, 50/60 Hz Up to 2 W of mains power consumption

Backup battery 1 × CR 2/3 AA Sealed

Installation

Enclosure

Complete set

Operating temperature range from 0°C to +50°C Operating humidity up to 80%	Color black, white Dimensions 122 × 122 × 54 mm	FireProtect 2 AC (Heat/CO) Jeweller SmartBracket mounting panel 1 × CR 2/3 AA battery (sealed) 2 × WAGO 221-3 connector	
	Weight 305 g	(pre-installed) Installation kit Quick start guide
