

12V PSU for NVR

Power supply unit for the device operation on a low-voltage power source

• Uninterrupted recording in a power outage

12V PSU for NVR is an electronic board that is installed into the video recorder enclosure, replacing the standard 110/230 V~ power supply unit. With the alternative power supply unit, an Ajax NVR can operate on a low-voltage power source instead of the facility's power grid. This setup ensures continuous video recording, making it ideal for protecting property with unstable or no power supply.

Hassle-free installation

A professional electrician can install the alternative power supply unit into a network video recorder in just about 10 minutes, using a single PH1 screwdriver and the device manual.

- 12V PSU for NVR is installed directly inside the NVR enclosure, replacing the standard 110/230 V~ power supply unit.
- A standard jack plug is used to connect the power cable.

• A terminal adapter is included in the complete set.

12V PSU for NVR supports two operating modes:

8-16 V---

In this mode, an Ajax video recorder operates within the 8-16 V= voltage range. A jumper should not be installed.

12.1-16 V---

This mode allows an Ajax video recorder to operate on a voltage that exceeds 12 V=. To prevent a full discharge of the power supply, the NVR automatically switches off if the voltage drops below 12 V=. A jumper must be installed.

Compatibility

NVR (8-ch) NVR (16-ch) **Connection to mains**

Socket 6.5 × 2.0 mm 0.26" × 0.08" Power jack (female)

Plug 5.5 × 2.1 mm 0.22" × 0.08" Power jack (female)

Connected cable cross-section AWG 12-14 Input without a jumper

Operating voltage 8-16 V==

Maximum current consumption up to 4 A When output maximum current consumption is 2 A

Turn-on threshold when the voltage rises 8.1 V== In the no-load state

Turn-off threshold when the

Input with a jumper

Operating voltage 12.1–16 V==

Maximum current consumption up to 4 A When output maximum current

consumption is 2 A

Turn-on threshold when the voltage rises 12.1 V== In the no-load state

Turn-off threshold when the

		voltage drops 8.0 V== In the no-load state	voltage drops 10.35 V== In the no-load state
Output	Installation	Board	Complete set
Nominal voltage	Installation method	Color	12V PSU for NVR
12 V== ± 3%	inside the NVR enclosure	N/A	Terminal adapter
Shutdown device's current consumption 110 μΑ	Operating temperature range from 0 °C to +40 °C from 32 °F to 104 °F	Dimensions 118 × 123 × 17 mm 4.64" × 4.84" × 0.67"	Quick start guide
Quiescent device's current consumption 65 mA	Operating humidity up to 75% Protection class	Weight 51 g 1.80 oz	
Maximum device's current consumption 2 A	IP20
